

Automatic Solutions S.A.S. has extensive experience in the manufacturing of control panels that meet all industry standards for protection and construction, such as RETIE and others.

Automatic Solutions S.A.S. is also dedicated to the commercialization of electrical and electronic equipment, including PLCs, process instrumentation equipment, and automation equipment, as well as data acquisition software, to provide engineering services in instrumentation and automation.

We offer services for the upgrading of control systems, with or without PLCs, reusing some existing components or completely redesigning the control architecture.

All our personnel are qualified to properly execute the applications mentioned here and to carry out automation and instrumentation projects for different types of processes nationwide.
